

CS 111, Summer 2014 Design Project

Propose an implementation of a topic that has been or will be taught in this course. Choose a sub-portion of the general topic of interest.

- You may work in teams of 2 and need to stay with the same partner throughout. Each document must include each team member's Last Name, First Name, Student ID #, and include the Title of your project.

All submissions are due by 11:55PM (Pacific Time) on the specified due dates on CCLE.

Part 1: due Thursday, July 24nd

- Submit a 1 page proposal (12 point font) in a Word document (.doc or docx) with PowerPoint slides (.ppt or .pptx) clearly stating your interest in the project, design, and milestones with dates and goals.

The TA will reply approving or requiring changes/additional work after the deadline. Please wait for the reply before you start.

Part 2: Tuesday, July 29th

- Submit your implementation so far in a tar.gz file (containing the source files properly commented), a readme document clearly describing step by step how to execute and test your implementation including test cases (if any), and another document describing the shared work with your partner and individual work.

Part 3: due Monday, August 4th

- Similar to part 2, but submitting your completed proposed project.
